Online Workshop on "Intellectual Property Rights (IPR) & Patents and Design filing."

Date: 06th October 2022,

The workshop was Jointly Organized by H.K. College of Pharmacy, Jogeshwari, Mumbai & In association with Rajiv Gandhi National Institute of Intellectual Property Management (RGNIIPM) Government of India, Nagpur The Workshop is Catalysed and Supported By the Department Of Science And Technology, Government of India held on 6th October 2022.

Purpose of the workshop

The workshop's goals Gaining an advantaged position to support our country's economic progress depends heavily on intellectual property rights. The R&D workforce and infrastructure in India are significant assets. For the protection of the intellectual output of Indian scientists, scientists and decision-makers require greater information, training, and facilities. Therefore, this workshop was organized to inform the medical and paramedical professors and students about the IPR.

- **Program started with Lightening the Lamp by Dr.Indira Parab, Dr. Jaya Agnihotri and Dr. Madhuri Pawar, Ms. Sehrash Ansari, Ms. Janhavi Mishra, and Ms. Shweta Kulapurath in association with our chief guest Dr. Pooja vishal Maulikar**

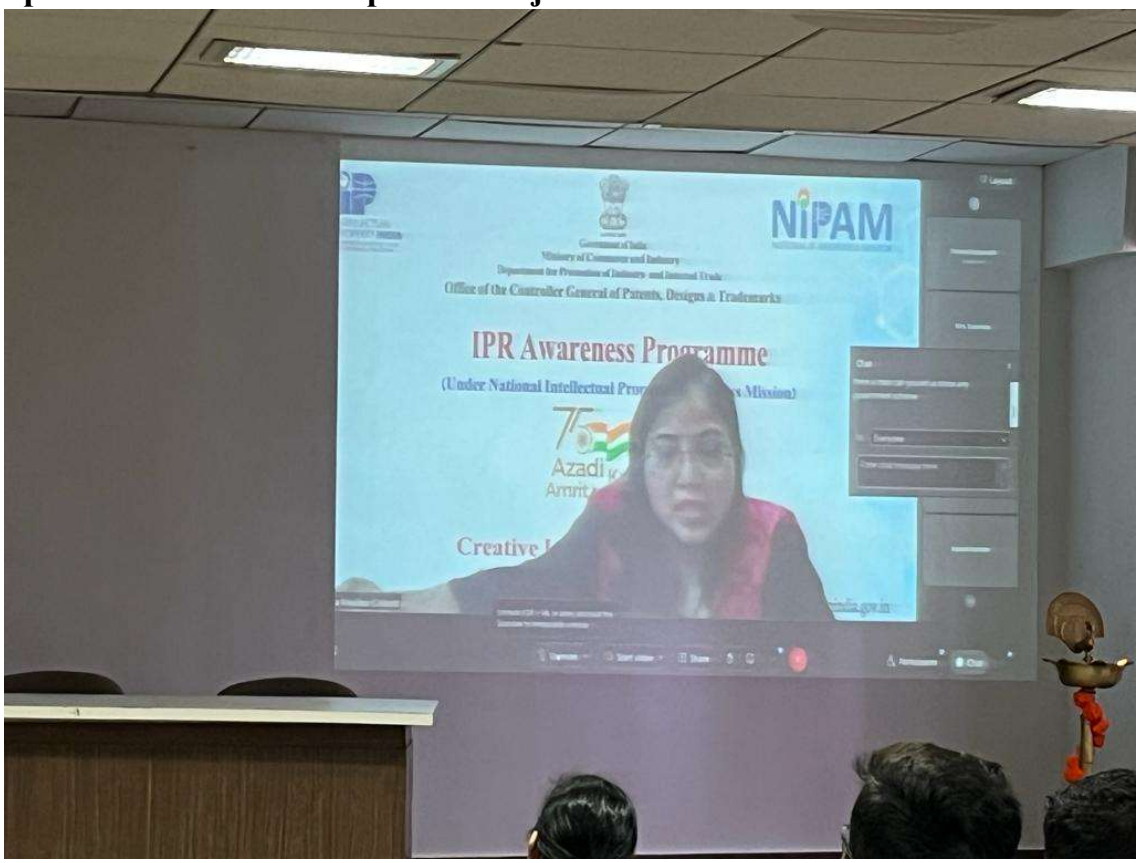
- **Introduction of Speaker by Ms. Janhavi Mishra**

- **Speaker of the Workshop Mrs. Pooja Vishal Maulikar**



- **Question and Answer session by the participant**
- **These were some interactive sessions between students and the speaker**

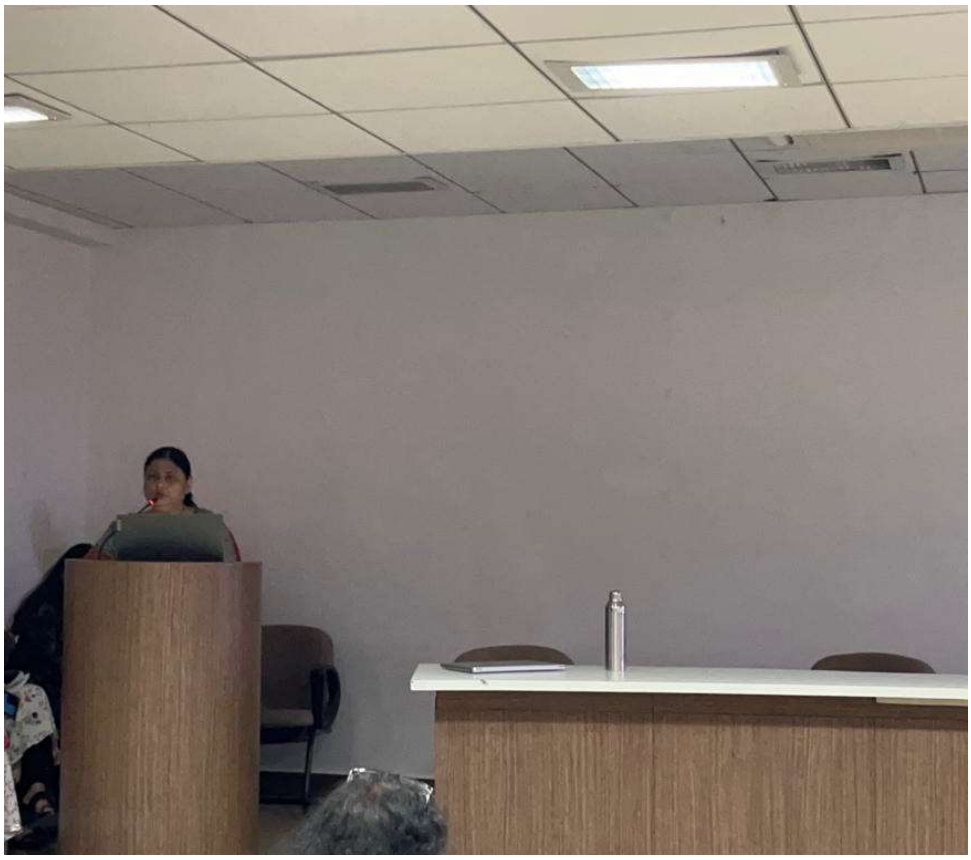
  Question: What does it mean to “license a patent” and why is it done?

  Answers: Licensing a patent simply means that the patent owner grants permission to another individual/organization to make, use, sell, etc. his/her patented invention. This takes place according to agreed terms and conditions (for example, defining the amount and type of payment to be made by the licensee to the licensor), for a defined purpose, in a defined territory, and for an agreed period of time

  Question: Do I need a patent attorney/agent to prepare and file a patent application?

  Answers: In general, applicants can prepare their patent applications and file them without assistance from a patent attorney. However, given the complexity of patent documents and the legal skills required, such as claim drafting, it is highly advisable to seek legal assistance from a patent attorney/agent when drafting a patent application.

- **Thankyou Address by Dr. Jaya Agnihotri**



- **Course Materials**

The discussion covers the following subjects.

a. Copyright and Trademark Management in India with Case Studies
b. Ethical Issues Related to Clinical Trials and IPR
c. Compulsory licensing and Bolar Exemption in India
d. Patenting of Pharmaceutical Compositions and Medical Devices - Guidelines
e. Tools for Patent Searching - Panel Discussion on Life Science Inventions
f. Patent Filing and Commercialization Procedures
g. Patent System in India and National Biodiversity - Biotechnological Inventions

- **Participants of the workshop**

A total count of 291 from various medical and para-medical institutions participated.

B.Pharm Participants from H.K. College of Pharmacy were 127

M.Pharm Participants from H.K. College of Pharmacy were 15

The teaching staff from H.K. College of Pharmacy was 20

Other institute students and staff were 129

Feed back

All lectures are very good

It was a very useful workshop

We learned about the IPR process and types of rights.
