VISION: To Be recognized as the Institution providing quality education in Pharmacy to serve the health care sector

Dr. Yogesh Jadav began his speech by warning the audience about fake websites and cybercriminals/hackers.

Dr. Yogesh Jadhav made the audience aware that a hacker plays on a victim's sentiment and tends to hurry his victim to commit mistakes while they are online.

He requested his audience to take into account the following :-

- Never upload high resolution pictures on social media, they may be used in porn-videos which can then be used as a blackmail medium. Avoid close face photographs.
- Never upload your personal details online.
- Always disable international transactions when not required in your credit card account or in your debit card account. Since OTP (one time password) is not required for international transactions.
- There are pre-filled QR codes, so never blindly sanction amounts without checking in UPI transactions. Always check the bank name in the UPI address and confirm it with the receiver before sending money to that account.
- Never access any link given on Whatsapp. Never download .apk files sent on WhatsApp.
- Cybercrimes are committed often on Facebook Messenger so check URL, Time Line, Common Friends before accepting a friend request on Facebook Messenger.
- One bitcoin is valued at 35 lakhs. Cryptominers send mining softwares and take control of the CPU or laptop. If your laptop becomes slow suddenly...it may be a problem.
- Never transact on bitcoins since they cannot be traced.
- Avoid Loan apps.
- Avoid getting honeytrapped.
- Register your financial fraud or complaint in National Payment Corporations of India (NPCI) (<https://www.npci.org.in/>) within two hours of a fraudulent UPI transaction and within 1 day of a NEFT transaction.
- Websites can be cloned. Go to the <https://who.is/> website. Paste in the URL of the website and check the date of origin of the website, owner of the website, security certificate to determine the authenticity of any given website.
- Check whether your email address is part of the darkweb. Go to <https://haveibeenpwned.com/> Website, paste your email address and check where your email is breached.

- Carefully check the messages received from supposedly bank officials. Banks will never ask you to access short URLs.

He then showed how a website can easily be cloned by easily available tools and so one should be very careful while sending money via the websites.

Prof.(Dr.) Tushar Lokhande, Principal H.K. College of Pharmacy, felicitated Dr. Yogesh Jadhav. The session was appreciated by all.
